

KNOBLOCH

High Quality Strings

The Art of Vibration

If we had to identify one common trait that defines Knobloch Strings, it would be, without a doubt, our passion for music: we are guitarists and we live and think like musicians.

The passion and care we take at each stage of the production, from the selection of the raw materials to the hand packaging of the strings, is a fundamental characteristic of Knobloch Strings and is what creates strings of the highest possible quality.

Perfect intonation, well-balanced with a warm and full sound, Knobloch Strings are acclaimed by today's leading guitarists, both nationally and internationally.

The passion we share with musicians and luthiers allows us to strive for new ways of understanding music and bringing it to life.

If it's true that everything moves with vibrations, we like to think that our work helps the world vibrate more fully through Art.

New Image

Knobloch Strings is always aiming to improve and innovate and to reflect this objective we have decided to modernise our design and our logo.

New Products

STERLING SILVER

Our most exclusive strings, Sterling Silver basses bring a refinement to the sound through the use of this highly valued metal. These pure silver strings are in a league of their own. The high-quality sterling silver gives a warm and pure sound with a profound sustain. They offer an unsurpassed durability, retaining their brilliance and warmth longer than other strings. Designed for the professional guitarist looking for a smooth, delicate and full-bodied sound with unsurpassed durability.

Feel the finesse under your fingers.
Exceptional strings for exceptional performers.

Known for their versatility and resonance, Double Silver basses bring volume and a balanced tone to every type of music. From live performance to the recording studio, Double Silver can rise to any occasion. Designed for the musician who needs well - balanced strings with big resonance and a beautiful tone.

Experience the difference these skillfully crafted strings make, feel the vibration through your fingers.
Unleash your musical creativity.

ACTIVES
KINDER
3/4 GUITAR

We believe that having good strings from the beginning is very important as it develops an awareness of tone and tone-production from the start. Kinder Actives are specially designed for kids. Without losing any of the Actives' beautiful sound and great intonation, these strings are easy to play and long lasting. They make learning guitar an enjoyable experience for the child as well as the listening parent.

Knobloch's trebles

CX
CARBON

For guitarists wanting to add punch and volume to their playing our Carbon CX trebles are the ideal trebles. They bring a brilliance and clarity to the sound and increase your projection. Made from a high-density material, the Carbon CX have the thinnest diameter of our trebles strings and have the most crystalline sound. They are ideal for players looking for added projection and an added bite to their playing.

QZ
NYLON

The Nylon QZ trebles offer a more refined and lyrical sound. This newest generation of premium nylon has a slightly thinner diameter and produces a warm, sweet sound. The thinner diameter of the string doesn't affect the volume, and still offers a rounded tone. The Nylon QZ have a velvety smoothness and perfect balance and are designed for players aiming for a more elegant and classy sound.

SN
NYLON

The Nylon SN trebles have a traditional sound without losing volume. The material of this old generation of nylon, combined with a slightly thicker string diameter, brings a sweetness and provides a smooth and comfortable feel under the fingers. For those looking to capture the warmth of the familiar classical guitar sound, these Nylon SN give a rounded tone and impeccable intonation.
